IG6 secures further non-dilutive construction finance for Collie

International Graphite Limited is pleased to announce it has executed non-dilutive construction finance loan agreements to support construction of the production building for the Collie Micronising Facility in Western Australia.

The finance facilities complement existing equity commitments, forecast R&D funding receipts and funding remaining available under the $4.5 million Financial Assistance Agreement with the Collie Investment and Transition Fund.

Managing Director and Chief Executive Officer Andrew Worland commented: “Construction at Collie is advancing rapidly with the production building firmly on track for completion in Q2 2027. As the first of our two planned global production facilities — alongside the planned facilities at Porto Marghera in Italy - Collie will establish IG6 in the Asia Pacific market at a time when sovereign supply chains are becoming a critical priority for global customers.”

The finance facilities with National Australia Bank consist of a secured business markets loan and an overdraft facility totalling approximately $1.5 million. The business markets loan will fund construction costs and has a two year term with interest capitalised. At the conclusion of the two-year term, the loan will convert to an amortising loan over 13 years. Interest rates are typical of a construction facility of this nature.

Authorised for release by the Board of International Graphite Limited.

About IG6

International Graphite Limited (ASX: IG6, FWB: H99) is establishing mid-stream graphite processing operations in Australia and Europe to supply advanced industrial graphite products for established markets seeking secure and reliable alternatives to traditional supply chains. Through the Collie Micronising Facility in Western Australia and the Alkeemia / IG6 Joint Venture at Porto Marghera, Italy, the Company is developing a capital-efficient graphite processing platform, supported by proven technologies and industry partnerships. The platform is designed to serve growing demand from industrial, energy storage, advanced manufacturing and defence applications. IG6 also owns the globally significant Springdale Graphite Project in Western Australia, providing long-term feedstock optionality for future scaling of process operations. Strong support from the Australian and Western Australian Governments reflects IG6's significance to national critical minerals capability and regional economic diversification.

Forward-looking statements

Certain statements in this announcement relate to the future, including forward-looking statements relating to the Company and its business. Forward-looking statements include, but are not limited to, statements concerning International Graphite Limited planned business activities and other statements that are not historical facts. When used in this document, the words such as "could", "plan", "estimate", "expect", "intend", "may", potential", "should", and similar expressions are forward looking statements.

These forward-looking statements involve known and unknown risks, uncertainties, assumptions, and other important factors that could cause the actual results, performance or achievements of the Company to be materially different from future results, performance or achievements expressed or implied by such statements. Actual events or results may differ materially from the events or results expressed or implied in any forward-looking statement and deviations are both normal and to be expected. Neither the Company, its officers nor any other person gives any representation, assurance or guarantee that the events or other matters expressed or implied in any forward-looking statements will actually occur. You are cautioned not to place undue reliance on those statements.
